3

Thread 3 aims to bring companion robots into the real-world by developing **use cases**, exploring **new interaction methods**, and designing the entire **lifecycle of use**.

Research Thread 3:
Building Companion Robots for Long-Term Interaction

CHI 2017, SCIENCE ROBOTICS
POPULAR MECHANICS
HRI 2023, IDC 2022 BEST PAPER AWARD

Understanding "unboxing" robotic products

Designing novel "unboxing" experiences

Building social companions for long-term interaction

Studying long-term interaction through deployments

Child reading to the robot
